# Nanocap™

... with the ability to **capture and cap nanoparticle**

Third party tests show that our technology **removes nanoparticles better than state-of-the-art UPW equipment**. We are now manufacturing a small number of demos to enable you to test it out in your own facilities.

## MAKE NANOPARTICLE FREE TYPE1WATER

- **Compact size** - will fit on your desktop
- **Run anywhere** - Connected or Stand-Alone mode
- **Store your water** - Nitrogen blanketing to ensure safe storage
- **Start with tap-water** - Does not require UPW as feedwater
- **Simple maintenance** - No chemicals and no filters

Wherever nanoparticle free water is required a Nanocap will be suitable.

# Nanocap™

## Quality of the water

Nanocap is a desktop water purifier that will remove sub-10 nanometre particles better than state-of-the-art equipment. The purity is documented and proven by numerous 3rd party organisations including Horiba Scientific.

## NO DISPOSABLES, NO FILTER CHANGE

## RUN ANYWHERE - CONNECTED OR IN STAND-ALONE MODE

### Start with any tap water

Nanocap does not require pre-filtration but can run on any drinking water

- Feedwater through standard laboratory connection on rear
- Or lid on top for manual filling

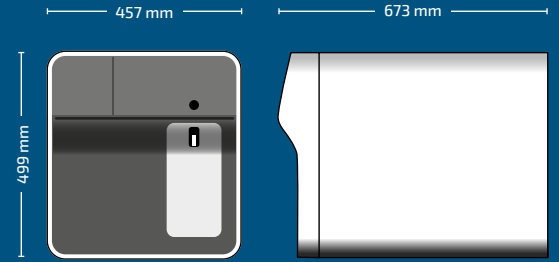

*"We really appreciate consistent quality of your product (Nanocap) which is much better than water obtained from typical lab filtration systems"*

Jan "Kuba" Tatarkiewicz, PhD DSc R&D  
Global Director HORIBA Scientific
